### Getting Started

- Free technical support
- Comprehensive, cross-referenced documentation
- QuickStart Videos that demonstrate common tasks
- Quick Reference Guide provides instant access to common keystrokes/tasks
- User Manual with integrated video
- On screen Message Bar identifies tools and their uses
- Auto Detect MIDI Device makes setup easy
- Instrument “Set-up Wizard” provides easy score set-up with full page layout and instrument transposition
- Open same or previous version Finale®, Allegro, PrintMusic, and NotePad files, retaining all data and settings
- Pre-designed templates

### Included music fonts:
- Broadway Copyist, Engraver, Finale AlphaNotes, Finale Copyist, Finale Lyrics, Finale Mallets, Finale Numerics, Finale Percussion, Jazz, Maestro, Maestro Wide, Petrucci, and Tamburo.

### Unicode font support, providing access to any font character (and in any language)

### Entering Notes

- Use a palette to click notes, accidentals and rests onto the staff
- Enter pitches and rhythmic values using a mouse or MIDI instrument

### Adding Markings, Lyrics, and more

- Individual score elements display in different colors for easy distinction
- Dockable palettes provide an uncluttered workspace
- Use a Smart Shape palette to place hairpins, lines, and other shapes onto the score
- Create and position titles, credits, copyright notices and other text
- Control font, size, style and alignment
- Automatically align lyrics with notes
- Automatically avoid collisions of lyrics when re-spacing notes
- Notate an acoustic instrument as it plays a melody (monophonic, or single-line only)
- Scan existing sheet music with FREE SmartScore™ Lite software by Musitek (included)
- Convert SmartScore and MIDI2Music scanned music files into Finale notation files
- Open SharpEye scanning files via MusicXML (SharpEye is Windows only)
- Enter notation in real time with the HyperScribe tool. Speed up or slow down tempo during notation.
- Specify instrumentation while scanning, producing correctly transposed playback
- Enter rhythmic values from a MIDI keyboard

### Entering Dynamics and Tempo markings

- Enter dynamics and tempo markings
- Enter dynamics and tempo markings
- Add repeats that automatically playback
- Automatically create separate coda systems
- Center or left align chord symbols
- Create and edit your own chord symbols, including alternate bass indication
- Add rehearsal marks and measure numbers, then emphasize them with ovals or rectangles
- Move lyrics, chords, expressions, titles, text blocks and other elements
- Place large blocks of text with a built-in text editor
- Instant word extensions and hyphens automatically wrap to the next staff-system
- Play chords on a MIDI instrument for automatic analysis and naming
- Positioning guides for accurate placement of chord symbols
- Notate TAB as you play a MIDI guitar
- Automatically add guitar fretboards
- Automatically transpose chord symbols with changes in key
- Automatic guitar tablature
- Automatically notate percussion staves that playback without extra configuration
- Enter chord symbols by typing in their names or by playing them with a MIDI keyboard
- Add repeats that automatically playback
- Automatically create separate coda systems
- Center or left align chord symbols
- Create and edit your own chord symbols, including alternate bass indication
- Add rehearsal marks and measure numbers, then emphasize them with ovals or rectangles
- Move lyrics, chords, expressions, titles, text blocks and other elements
- Place large blocks of text with a built-in text editor
- Instant word extensions and hyphens automatically wrap to the next staff-system
- Play chords on a MIDI instrument for automatic analysis and naming
- Positioning guides for accurate placement of chord symbols
- Notate TAB as you play a MIDI guitar
- Automatically add guitar fretboards
- Automatically transpose chord symbols with changes in key
- Adjust tie, slurs, crescendos and diminuendos
- Mix fonts, font sizes and styles (English, Nashville, Roman, German, etc.) within chord symbols
- Change or delete notes without changing your chords
- Show only the tools you need or display all tools
- Independently specify the alignment, position and font for any staff name
- Create word extensions
- Shift lyrics right or left by syllables
- Hide signatures and accidentals on individual staves
- Create lyrics all at once and click onto the score one syllable or verse at a time
- Mix fonts, sizes and styles
- Analyze chords from notation across one or two staves
- Customize fretboard diagrams that transpose intelligently

### Editing Tools

Select any group of notes for editing, including partial measures
View each window in any fashion desired (page or scroll view, magnification, and measure location)
Resize view from 5% to 100%
Size and position tool palettes to fit the way you work
Cut, copy and paste text
Cut, copy and paste between windows
Reposition any symbol, character, graphic or text anywhere on the page simply by dragging it
Multiple undo even past the last “Save”
Apply “smart articulations” with automatic positioning and stem direction sensitivity
Drag and drop dynamics and tempo markings
Resize notes to automatically avoid collisions of lyrics
Quickly manipulate any item using the Selection tool
Simultaneously view and edit multiple pages
Instrument doubling made easy

### Hearing Your Music

Play your score through a MIDI instrument, sound module, sound card or internal computer speaker
Human Playback® plays feeling, phrasing and nuance in a variety of styles
SmartMusic® SoundFont - 128 sounds included free
Play back repeats, dynamics, tempo changes and chord symbols
Play a note, chord, phrase, selected staves or an entire score
Define playback sounds of each staff, layer of music and/or chord symbols
Assign a MIDI channel or patch, and play/solo/mute setting for each staff
Map multiple staves to the same instrument sound
Row-Loff marching percussion sounds included
Play back as you played it - retaining your original MIDI performance including key velocity, pitch bend, rubato, and more
Program the percent of “swing feel” for playback
Percussion staves automatically plays back without extra configuration
Integrated Garritan® Aria Player® with Ambience Reverb
More than 425 world-class Garritan instrument sounds for realistic playback
More than 100 concert and marching percussion sounds from Tapspace™
External sound library support (VST/AU instruments and effects)
Boomwhackers® tuned percussion tube sounds
Define/control playback of interpretive marks, text and shapes
Define your own scales and micro tonality
Assign a playback effect to any graphic
Control all aspects of playback, in one place, with the ScoreManager®

### Sharing your Music

Use free Finale SongBook iPad app to view, play, and print Finale family notation files
Print professional quality sheet-music
Open files created by same or earlier product version
Backwards compatibility with previous version of software
Export MIDI and MusicXML files
Save as Audio File to create CDs (MP3, WAV, AIF)
Export your score or a section of your score as a graphic files

### Educator Tools

Create custom worksheets or quizzes by exporting music into word processing programs
Exercise Wizard instantly creates materials for an entire ensemble
Orff Instruments in Set-up Wizard
Create SmartMusic accompaniments (SmartMusic use requires a subscription)
Ready-made, customizable music education worksheets included
Includes solfege, instant tonic sol-fa conversion plus popular band, orchestra, choral and church music templates
Colored noteheads
Finale AlphaNotes font puts note names inside noteheads, benefiting beginning readers
Finale Numerics font makes it easy to type in Roman numeral or harmonic analysis

- **Define up to four layers of music per staff with two independent voices per layer**
- **Create any number of staves and measures up to 32,768**
- **Use standard or non-standard key signatures**
- **Automatically avoid collisions of mid-score and mid-measure clefs, 2nds, and unisons when using layers**
- **Play any range of measures at a specified tempo with on-screen Playback Controls**
- **Set-up Wizard automatically assigns General MIDI patches and channels**
- **Easily set up key and time signatures using the Set-up Wizard**
- **View a score in either scroll view (continuous staff) or page view**
- **Scroll music on-screen during playback in page or scroll view**
- **Band-in-a-Box Auto Harmonizing automatically adds two to six-part harmonies of selected styles**
- **Drum Groove creates custom drum parts instantly**
- **Control the distance between the staff system and the staff system above**
- **Enter an unlimited number of notes per measure**
- **Control stem direction individually**
- **Control the number of measures in each staff system**
- **Transpose using chromatic, diatonic, enharmonic or modal methods**
- **Transpose, rebar, or rebeam music with single commands**
- **Instantly switch views between the score and individually linked parts**
- **Use on-screen rulers to position score elements**
- **Add graphic repeat signs and text repeat markings**
- **Reduce a score, page, staff system, note group or single note down to 5%, or enlarge it up to 999%**
- **Extract individual parts from a score, with separate page layout control for each part**
- **Adjust measure widths**
- **Choose from over 30 pre-designed score templates to help you quickly prepare professional scores**
- **‘Optimize’ the conductor’s score by hiding empty staves**
- **Save multiple MIDI/instrument setups**
- **Re-quantize any notes in any region entered from any note entry method**
- **Protect scores with automatic backup**
- **Capture music as you play, then convert to notation later! Record one ‘track’ while playing back others**
- **Define your own noteheads; change the shape of any notehead**
- **Specify separate time signatures for display and beaming control**
- **Use different time and key signatures in each staff**
- **Latin percussion rhythms included**
- **‘Explode’ scores to create instant orchestrations**
- **‘Implode’ scores to create instant piano reductions**
- **Add Cue Notes - easily place cue notes on any staves in any layer at any percentage**
- **Align/Move Dynamics - vertically align all selected dynamics, expressions and hairpins**
- **Automatic Barlines - place double-barlines automatically before all key changes and a final barline at the end of the score**
- **Automatic Dynamics Placement - automatically places dynamics on the score based on MIDI key velocity**
- **Canoic Utilities - transforms the selected region using inversion, retrograde, transposition or any combination of these**
- **Cautionary Accidents - allows various forms of cautionary accidents added to your score including display on all notes**
- **Change Fonts - Change fonts globally for text blocks, staff names, group names and lyrics**
- **Change Noteheads - allows you to change the noteheads of all the notes in the selected region**
- **Change Stem Direction - changes the stem direction of notes on the middle staff line to follow the direction of the melodic line**
- **Change to Default Whole Rests - allows you to change all the whole measure rests in the selected region to default rests**
- **Change to Real Whole Rests - allows you to change all the default measure rests in the selected region to real whole rests**
- **Check Range - verifies the selected instruments range with setting for beginner, intermediate and advanced players**
- **Check Region for Durations - checks the selected region for any measures that have too few or too many beats**
- **Chord Morphing - generates a variety of smooth between-chord transitions**
- **Chord Realization - generates four-part realizations of a triad based on major key and scale degree specified**
- **Chord Reordering - finds new placement options for chords**
- **Chord Splitting - creates subsets of the original chord**
- **Classic Eighth Beams - beam-eighth notes together when using common time over the selected region**
- **Clear Lyric Positioning - will reset any changes you’ve made to your lyric baselines in the selected region**
- **Clear Measure # Positioning - clears all measure number positioning in the selected region and sets it to the default position**
- **Command Line - allows for quick note entry by typing in specific text commands**
- **Common Tone Transposition - creates a series of transpositions where one note is equal to one note of the original chord**
- **Easy Harmonics - string harmonics fast and easy**
- **Easy Tremolos - create tremolos for display and playback**
- **Find Range - Run this plug-in to find the highest and lowest notes in the selected region**
- **Frequency Modulation Chord Generator - generates a series of chords with increasing complexity and texture**
- **Global Staff/Group Attributes - apply the same staff or group attributes to any staves or groups**
- **Handbells Used Chart - instantly creates a chart based on note usage**
- **Latin Percussion - automatically adds pre-created Latin percussion grooves in a variety of styles**
- **Melodic Morphing - creates a melodic transition from one melody to another**
- **Menu Shortcuts - write your own script to automate common tasks**
- **Midline Stem Direction - changes the stem direction of notes on the middle staff line to follow the direction of melodic line**
- **Mid-Measure Repeats - automates the process of creating repeats in the middle of a measure**
- **Move Rests - lets you move rests in the selected region to a different vertical position**
- **Number Repeated Measures - Place numbers over measures that are repeated again and again**
- **Piano Reduction - creates a piano reduction of the selected staves**
- **Rhythmic Subdivisions - Change the selected region to eighth notes, or divide all your notes in half**
- **Single Pitch - changes all the notes in your selected region to the specified pitch**
- **Smart Playback - adds a playback effect to glissandi, hairpins and trills**
- **Space Systems - automatically positions your staff systems evenly on each page**
- **Split Point - lets you reset the split point between two staves in the selected region**
- **Tie Common Notes - inserts a tie between any two successive notes if the notes have the same pitch**
- **Update Brackets & Groups**
- **Vertical Collision Remover**
- **Virtual Fundamental Generator - automatically gives the appropriate “root” for any selected group of staves**
- **Voice 2 to Layer - moves Voice 2 entries to the selected layer**
- **Word Extensions - add or remove word extensions to and from your lyrics**

---

**Finale Family Detailed Product Comparison Chart**

**Established 1983, Finale is the world’s standard desktop music composition software used by composers, arrangers, educators, publishers, and students.**

**Finale® is the only software for Windows and macOS that is suitable for all stages of music creation, from notation to score preparation and performance, and from small pieces to large scores.**

**Finale® is used worldwide in schools, on campuses, in research institutions, and by professional musicians, including the world’s renowned composers and arrangers.**

**The range of functions is unequalled. All the tools are easy to use.**

**Finale® is the standard desktop music composition software for Windows and macOS.**
